

The Commercial Vehicle Safety Alliance's (CVSA) 32nd annual International Roadcheck will take place June 4-6, 2019.

Over a 72-hour period, CVSA-certified commercial motor vehicle inspectors in jurisdictions throughout North America will conduct inspections of commercial motor vehicles and their drivers.

Each year, International Roadcheck places special emphasis on a category of violations. **This year's focus is steering and suspension.** While checking vehicle compliance is always part of the North American Standard Inspection Program, CVSA is highlighting steering components and suspension systems this year as a reminder of their importance to highway safety.

Inspectors will primarily be conducting the North American Standard Level I Inspection, which is the most thorough roadside inspection. It is a 37-step procedure that includes an examination of both driver operating requirements and vehicle mechanical fitness. Drivers are required to provide items such as their driver's license, hours-of-service documentation, motor carrier registration and shipping documentation, and inspectors will be checking drivers for seat belt usage and the influence of alcohol and/or drugs. The vehicle inspection includes checking items such as the brake systems, cargo securement, coupling devices, driveline/driveshaft, exhaust systems, frames, fuel systems, lighting devices (required lamps), steering mechanisms, suspensions, tires, van and open-top trailer bodies, wheels, rims and hubs, windshield wipers, and emergency exits (on buses).

International Roadcheck is the largest targeted enforcement program on commercial motor vehicles in the world, with nearly 17 trucks or buses inspected, on average, every minute in Canada, the United States and Mexico during a 72-hour period. Since its inception, more than 1.6 million roadside inspections have been conducted during International Roadcheck campaigns.

Be prepared for Roadcheck 2019.
